

CAREER PROFILE

Hello. I'm Salih, a Python and JavaScript developer who has stepped into the world of backend development. I would like to say that I am someone who is always hungry to learn and focused on continuous improvement as I progress rapidly in the magical world of software. Innovation, problem solving and teamwork are not only career goals for me, but also my passion. Taking part in new projects, pushing technological boundaries and learning every day has become a lifestyle for me. If you share the same excitement, I can't wait to work together 🚀

EXPERIENCES

Junior Software Developer

Monachus Bilişim A.Ş.

03/2023 - Present

CERTIFICATIONS

Udemy

Udemy

Udemy

Driven by a passion for learning, I spend my free time exploring different technologies and acquiring new skills. This includes delving into areas such as Python, JavaScript, SQL, Linux and more. This commitment to continuous learning allows me to stay updated with the latest advancements in technology, enhancing my proficiency and adaptability as a professional in the field.

PROJECTS

Side projects

Blog Platform -

- Using Python Django, I created a blogging platform where users can register and write posts and reviews on these posts.

Movie Review App -

- Using Python Flask, I created a movie review application where users can add movies, write reviews and rate movies.

Book Stock Management API (Django Rest Framework) -

- I developed an API project using the Django Rest Framework to efficiently manage book stocks. This project aims to facilitate bookstore operations such as stock tracking, updating and adding new books.
